

filters and regulators

5µm filter

- removes moisture and particles larger than 5µm
- available separately or combined with a regulator
- available with manual or automatic drain

5µm filter regulator with manual drain 4071035

5µm filter regulator with automatic drain 4071045

5µm filter with manual drain 4071000

5µm filter with automatic drain 4071010

0.01µm filter

- removes particles larger than 0.01µm, including water and oil aerosols
- available with manual or automatic drain

0.01µm filter with manual drain 4071055

0.01µm filter with automatic drain 4071065

0.01µm filter with automatic drain 4081500

Regulator

- adjusts the outlet pressure from the compressor

Regulator 4071025

Activated carbon filter

- removes possible oil vapour and odour in the compressed air

Activated carbon filter 4070500

Combination filter

- combines the features of a 0.01µm filter and an activated carbon filter
- available with automatic drain

Combination filter (0.01µm + activated carbon filter) with automatic drain 4080000
